

ClearSOL WetCling Film 125

■ glossy 3550 - 125 µm

The ClearSOL WetCling Film is a coated, transparent polyester film for solvent inks. The particularity of this media is the versatile coating system that combines the inkjet receptive layer and the composite for wet cling application. It can be used as normal clear film or when applied with soapy water as self-adhesive window-film. Even after months the film can be removed without leaving any residues.

Advantages

- Can be used as clear- or wet cling-film
- Self-adherent clear film without liner
- Easy to apply – easy to remove
- Excellent colour brilliance
- Very high transparency
- Also suitable for latex inks
