

SAFETY DATA SHEET

Novavit® 918 SUPREME BIO

SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier					
Product code	: VK10918D01				
Product name	: Novavit® 918 SUPREME BIO				
1.2 Relevant identified uses of the	e substance or mixture and uses advised against				
Product use	: Printing ink or Additive				
Uses advised against	: None known.				
1.3 Details of the supplier of the s	safety data sheet				
Manufacturer / Distributor	: Flint CPS Inks UK Ltd Old Heath Road GB Wolverhampton WVI 2QT UNITED KINGDOM				
e-mail address of person responsible for this SDS	: MSDS.UnitedKingdom.Wolverhampton.SF@flintgrp.com				
1.4 Emergency telephone number (with hours of operation)					
+44 (1902) 87 10 28 (8:00 h - 17:00 h)					
<u>History</u>					
Date of printing	: 08.10.2018.				
Date of issue/ Date of revision	: 06.09.2018.				
Date of previous issue	: 11.06.2018.				
Version	: 1.3				

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Not classified.

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements

Hazard pictograms	: Not applicable.
Signal word	: No signal word.
Hazard statements	: Not classified.
Precautionary statements	: Not applicable.
Supplemental label elements	: Safety data sheet available on request.
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	: Not applicable.
2.3 Other hazards PBT vPvB	 P: Not available. B: Not available. T: Not available. vP: Not available. vB: Not available.

SECTION 3: Composition/information on ingredients

3.2 Mixtures	: Mixture				
				Classification	
Product/ingredient name	Identifiers		%	Regulation (EC) No. 1272/2008 [CLP]	Туре
manganese neodecanoate	EC: 248-374-6 CAS: 27253-32-3	≤3		Aquatic Chronic 4, H413	[1]

See Section 16 for the full text of the H statements declared above.

There are no additional ingredients present which, within the current knowledge of the supplier, are classified and contribute to the classification of the substance and hence require reporting in this section.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures					
General	In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice.				
Inhalation	 Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. 				
Skin contact	Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.				
Eye contact	Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention/advice.				
Ingestion	 Remove victim to fresh air and keep at rest in a position comfortable for breathing. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. 				
Protection of first-aiders Use suitable protective equipme	No action shall be taken involving any personal risk or without suitable training. (section 8).				

4.2 Most important symptoms and effects, both acute and delayed

See toxicological information (Section 11)

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician	:	In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	:	No specific treatment.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable Extinguishing media	:	Recommended:, alcohol-resistant foam, CO2, powders, water spray
Extinguishing media not to be used	:	Do not use water jet.

5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture	:	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal decomposition products	:	Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.
		Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides metal oxide/oxides
5.3 Advice for firefighters		
Special protective actions for fire-fighters	:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
		Do not release runoff from fire to drains or watercourses.
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.
For emergency responders		If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.0 Environmental pressutions	•	

6.2 Environmental precautions

Do not allow to enter drains or watercourses. If the product contaminates lakes, rivers, or sewers, inform the appropriate authorities in accordance with local regulations.

6.3 Methods and materials for containment and cleaning up

Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Preferably clean with a detergent. Avoid using solvents.

6.4 Reference to other sections Reference to other sections

See Section 1 for emergency contact information.

See Section 13 for additional waste treatment information.

See Section 8 for information on appropriate personal protective equipment.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Keep container tightly closed. Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or mist arising from the application of this mixture. Remove contaminated clothing and protective equipment before entering eating areas. Workers should wash hands and face before eating, drinking and smoking. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Put on appropriate personal protective equipment (see Section 8). Always keep in containers made from the same material as the original one. Comply with the health and safety at work laws.

SECTION 7: Handling and storage

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with all local, regional, national and international regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Observe label precautions. Keep container tightly closed and in a well-ventilated place. Prevent unauthorized access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Storage temperature: 5 to 35°C

7.3 Specific end use(s)

Not applicable.

7.4 Additional information

Materials such as cleaning rags, paper wipes and protective clothing, which are contaminated with the product may spontaneously self-ignite some hours later. To avoid the risks of fires, all contaminated materials should be stored in purpose-built containers or in metal containers with tight-fitting, self-closing lids. Contaminated materials should be removed from the workplace at the end of each working day and be stored outside.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational exposure limits Other Exposure limits		Not applicable. CMR: See toxicological information (Section 11)
Recommended monitoring procedures	:	If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

DNELs/DMELs

No DNELs/DMELs available.

PNECs

No PNECs available.

8.2 Exposure controls

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapors below the OEL, suitable respiratory protection must be worn.

Individual protection measure	S	
Respiratory protection	:	Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.
Body protection	:	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

SECTION 8: Exposure controls/personal protection

Hand protection	 Avoid all skin contact with product, clean up contamination/spills as soon as they occur. Wear gloves (tested to EN374) if hand contamination likely, wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.
Gloves	 For prolonged or repeated handling, use the following type of gloves: 4 - 8 hours polyethylene (PE) or Viton® Gloves.
	References: http://www.esig.org/en/library/publications/best-practice-guides
Other skin protection	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Eye/face protection	: Use eye protection according to EN 166.
	Use safety eyewear designed to protect against splash of liquids.
Environmental exposure co	ntrols

Do not allow to enter drains or watercourses.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance		
Physical state	:	🗾 🗹 🗹 🖌 🖌 🖌 🖌 🗸 🖌 🖌
Color	:	Black.
Odor	:	Pleasant, ester-like.
Odor threshold	:	Not available.
рН	:	Not available.
Melting point	:	Not available.
Boiling point	:	≻ = 250 °C
Flash point	:	Closed cup: > 100°C [theoretical]
Evaporation rate	:	Not available.
Flammability (solid, gas)	:	Not applicable.
Burning time	:	Not applicable.
Burning rate	:	Not applicable.
Explosion limits		
Lower:	:	Not applicable.
Upper:	:	Not available.
Vapor pressure	:	✓0.1 hPa
Vapor density	:	Not available.
Density	:	✓1.1 g/cm³
Solubility	:	insoluble in water.
Partition coefficient: n- octanol/water	:	Not available.
Auto-ignition temperature	:	₢а 343 °C
Decomposition temperature	:	Not available.
Viscosity	:	Not available.
Explosive properties	:	Not available.
Oxidizing properties	:	Not available.
9.2 Other information		
SADT	:	Not available.

SECTION 10: Stability and reactivity

10.1 Reactivity

Not available.

10.2 Chemical stability

Stable under recommended storage and handling conditions (see Section 7).

10.3 Possibility of hazardous reactions

Under normal conditions of storage and use, hazardous reactions will not occur.

10.4 Conditions to avoid

When exposed to high temperatures may produce hazardous decomposition products.

10.5 Incompatible materials

Keep away from the following materials to prevent strong exothermic reactions:

oxidizing agents, strong alkalis, strong acids

10.6 Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

There are no data available on the mixture itself. The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended. See sections 2 and 3 for details.

Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in nonallergic contact dermatitis and absorption through the skin. If splashed in the eyes, the liquid may cause irritation and reversible damage.

Substances / Mixtures

Acute toxicity	:	Not available.
Acute toxicity estimates		
Not available.		
Irritation/Corrosion	:	Not available.
Sensitization	:	Not available.
Mutagenicity	:	Not available.
Carcinogenicity	:	Not available.
Reproductive toxicity	:	Not available.

toxicity (single exposure)		
Specific target organ	:	Not available.
toxicity (repeated exposure)		
Aspiration hazard	:	Not available.
Chronic toxicity	:	Not available.
Teratogenicity	:	Not available.
Other information		
Toxicokinetics		
Absorption	:	Not available.
Distribution	:	
Metabolism	:	Not available.
Elimination	:	Not available.

SECTION 12: Ecological information

There are no data available on the mixture itself. Do not empty into drains or watercourses. See Sections 2 and 3 for details.

12.1 Toxicity

Not available.

12.2 Persistence and degradability

Not available.

12.3 Bioaccumulative potential

Not available.

12.4 Mobility in soil

Not available.

12.5 Results of PBT and vPvB assessment

PBT

vPvB

: vP: Not available. vB: Not available.

: P: Not available. B: Not available. T: Not available.

12.6 Other adverse effects

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Do not allow to enter drains or watercourses.

Dispose of according to all federal, state and local applicable regulations.

Methods of disposal	E a n tr re a	he generation of waste should be avoided or minimized wherever possible. Impty containers or liners may retain some product residues. This material nd its container must be disposed of in a safe way. Dispose of surplus and on-recyclable products via a licensed waste disposal contractor. Disposal of his product, solutions and any by-products should at all times comply with the equirements of environmental protection and waste disposal legislation and ny regional local authority requirements. Avoid dispersal of spilled material nd runoff and contact with soil, waterways, drains and sewers.
Hazardous waste	: N	lo.

European waste catalogue (EWC)

Waste code	Waste designation
08 03 13 waste ink other than those mentioned in 08 03 12	

SECTION 14: Transport information

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

International transport regulations

revision

<u>14.1 UN number</u>	:	Not regulated.

Other Special Considerations about the Product:			

Materials such as cleaning rags, paper wipes etc, which are contaminated with coldset ink need not be assigned to ADR class 4.2, provided they are transported in containers of less than 450 liters capacity (ADR 2.2.42.1.5(c), Note 2). This exemption does not apply if contaminated materials are mixed with other wastes.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorization

Annex XIV

None of the components are listed.

Substances of very high concern

None of the components are listed.

None of the components are list		
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	Not applicable.	
VOC content	< 0,1 %	
Europe inventory	All components are listed or exempted.	
National regulations		
Industrial use	The information contained in this safety data sheet does not consti- user's own assessment of workplace risks, as required by other he safety legislation. The provisions of the national health and safety a regulations apply to the use of this product at work.	ealth and

15.2 Chemical Safety Assessment

This product contains substances for which Chemical Safety Assessments are still required.
